DETAILED ACTION

Status of the Claims

1. Claims 1-9 and 19-41 are pending.

The instant application which has been suspended due to potential interference is examined in this Office Action. Applicants' amendment filed May 6, 2003 is acknowledged. Applicants' response has been fully considered. Claims 1-4, 7-9 and 24-25 have been amended, and new claims 26-41 have been added. Therefore, claims 1-9 and 19-41 are examined.

New Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1-2, 4-9, 19-25 and 29-41 are rejected under 35 U.S.C. 102(e) as being anticipated by Bednarek (U.S. Patent 6,967,237, a 371 of PCT/US01/17026, filed May 25, 2001, which claims benefit of provisional application no. 60/207,920, filed May 30, 2000).

Bednarek teaches truncated ghrelin analogs have a formula of Z^1 -GSXF(Z)_n- Z^2 or a pharmaceutical acceptable salt thereof, where X is a modified amino acid containing a bulky hydrophobic R group; Z is independently Leu, Ser, Pro, Glu or other amino acids; Z^1 is an optionally present protecting group for N-terminal group; Z^2 is an optionally present protecting group for C-terminal group; n is 0-19, since each Z is independently selected, the resulting $(Z)_n$

Application/Control Number: 09/902,556

Art Unit: 1656

can be a contiguous amino acid group present in ghrelin (e.g., human ghrelin, GSS(Octanoyl)FLSPEHQRVQQRKESKKPPAKLQPR; column 2, line 50-column 3, line 18; column 5, lines 5-44), thus compounds of Z¹-GSXF(Z)_n-Z² would include GSS(Octanoyl)FLSPE (claims 1, 2) and GSXF-NH₂ (compound 22; column 6, lines 59-65), where X is Ser(Octanoyl), compound 22 has the same structure as SEQ ID NO:1 of the instant application (claim 4). The reference also teaches a pharmaceutical formulation comprising an effective amount of the truncated ghrelin analog and a carrier, which can be prepared in a form (e.g., a solution or suspension, or tablets) suitable for administering by nasal, oral, inhalation or intravenous injection (columns 10, line 20-column 11, line 20; claims 5-9, 19-25, 29-41).

Claim Objections

Claims 3 and 26 are objected to because the claim depends from a rejected claim, claim

Conclusion

4. Claims 1-2, 4-9, 19-25 and 29-41 are rejected; claims 3 and 26 are objected. Claims 27 and 28 are free of art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chih-Min Kam whose telephone number is (571) 272-0948. The examiner can normally be reached on 8.00-4:30, Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kathleen Kerr can be reached at 571-272-0931. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
